

To meet the long-term water needs of this area, Tampa Bay Water is building a new South Hillsborough Pipeline that will carry up to 65 million gallons per day of additional drinking water to the fast-growing southern Hillsborough County service area.

South Hillsborough Pipeline

The new South Hillsborough Pipeline will carry up to an additional 65 million gallons per day (mgd) of water to Hillsborough County's southern service area when complete in 2028. The pipeline will start at Tampa Bay Water's Tampa Bay Regional Surface Water Treatment Plant in Brandon, connect to Hillsborough County's Lithia Water Treatment Plant and end at the County's new connection point at Balm Riverview and Balm roads. The pipeline will provide redundancy between the Tampa Bay Regional Surface Water Treatment Plant in Brandon and Hillsborough County's Lithia Water Treatment Plant.

Tampa Bay Water's engineering consultants analyzed a total of 10 routes (five northern segments and five southern segments), which resulted in a shortlist of three top-ranked consolidated routes. The routes were evaluated against 13 selection criteria, which included non-cost factors such as public inconvenience, safety, environmental impacts and permitting, as well as project cost.

Tampa Bay Water's consulting engineers are currently completing the detailed design for the pipeline. Tampa Bay Water has received

\$4.5 million in co-funding from the Southwest Florida Water Management District for preliminary design and will apply for additional funds in fiscal year 2024 and beyond.

Fast Facts

- 26 miles long, up to 72 inches in diameter
- Cost: \$417 million; up to \$66.2 million to be funded by Hillsborough County
- Segment A route approved Sept. 19, 2022
- Segment B route approved Jan. 23, 2023

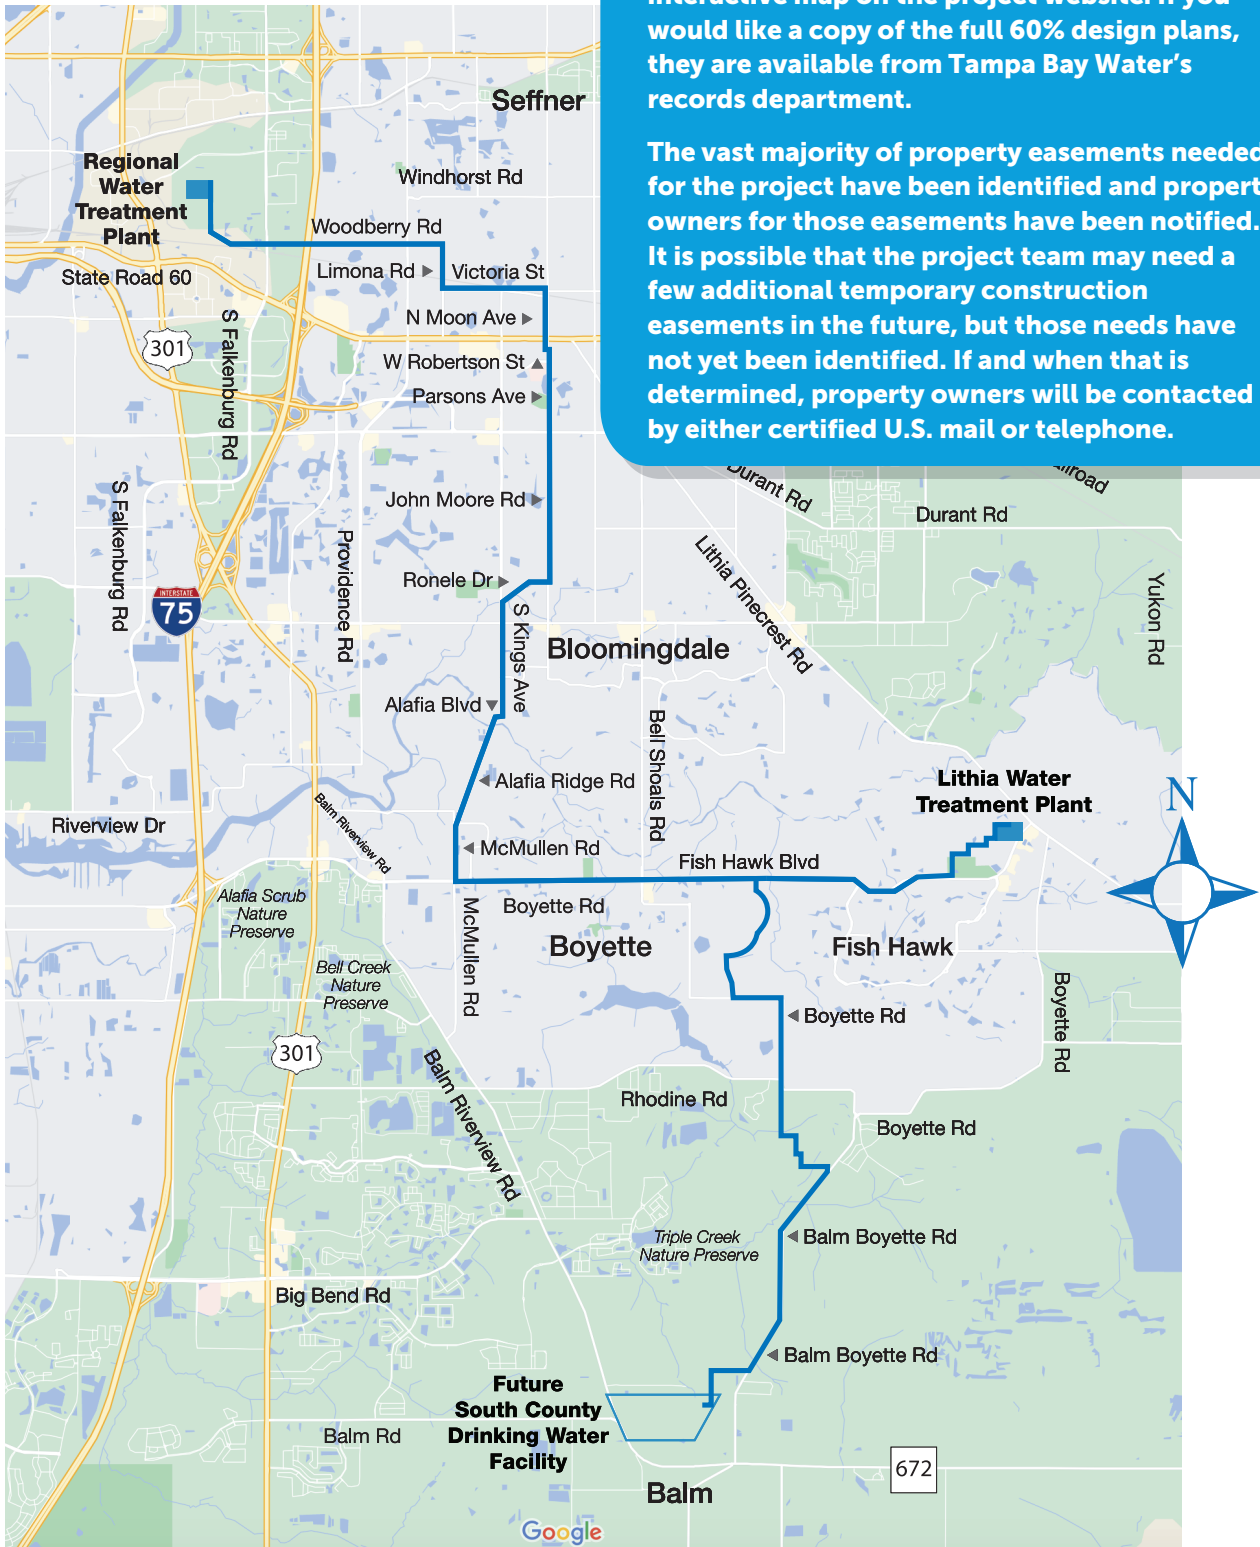

Pipeline Schedule

- Design: through third quarter 2025
- Identification of easements to be acquired: through July 1, 2024
- Construction start: third or fourth quarter 2025
- Construction complete: late 2028

South Hillsborough Pipeline Map

Note: The 60% design plans for this project are now complete. If you would like to see where your property falls along the pipeline route, visit our interactive map on the project website. If you would like a copy of the full 60% design plans, they are available from Tampa Bay Water's records department.

The vast majority of property easements needed for the project have been identified and property owners for those easements have been notified. It is possible that the project team may need a few additional temporary construction easements in the future, but those needs have not yet been identified. If and when that is determined, property owners will be contacted by either certified U.S. mail or telephone.

For More Information

Tampa Bay Water provides wholesale water to the public utility systems of Hillsborough, Pasco and Pinellas counties, as well as the cities of New Port Richey, St. Petersburg and Tampa. Visit SouthHillsboroughPipeline.com for information and project updates. You may also opt in to receive notices by sending an email to shpinfo@tampabaywater.org or by calling (813) 485-6480.
